

NASA Astrobiology Program

LIFE IN THE UNIVERSE

Why is Astrobiology so useful in education?

- Astrobiology tugs on those age-old questions that are buried deep in our DNA, and builds on our natural curiosity.
- The collaborative essence of astrobiology lends itself perfectly to working and learning in teams.
- The inherent challenges of exploration are ideal scenarios for problem-based learning.
- Astrobiology scoffs at the notion that 'everything is already known' and offers students a tangible sense that they can discover something and make an authentic contribution.

LIFE IN THE UNIVERSE

Educational Materials in Astrobiology

<http://astrobiology.nasa.gov/classroom-materials/>

Some created by NASA, some created by trusted partners:

- Educator Guides with hands-on activities, curricula, lesson plans and units
- Card games, “board” games
- Videos: from short talks to full length PBS broadcasts
 - FameLab! <http://famelab.arc.nasa.gov>
- Radio show segments, podcasts
- Web-interactives
- Posters, “trading” cards, graphic novels

LIFE IN THE UNIVERSE

Educational Materials in Astrobiology

<http://astrobiology.nasa.gov/classroom-materials/>

Educator Guides with hands-on activities, curricula, lesson plans and units:

- Life on Earth...and Elsewhere? (~grades 5-8)
- Rising Stargirls Activity Book (STEAM)
- ExoPlanet Activity Guide (ASP)
- Exploring Ice in the Solar System (grades K-5)
- Voyages Through Time (9th grade/year long)
- Astrobiology: An Integrated Approach (9th grade/year long)

Card Games and “Board Games”

- Astrobio-Bound! (MS and HS)
- Extrem-o-philés in the Classroom (MS and HS)

Cliffbot

Image Credit: NASA/JPL-Caltech
Required for accessing skylights, recurring slope lineae, and polar ice cliffs
PROS:

- Can get to areas other rovers cannot
- Medium speed and work on rocky terrain

CONS:

- Untested on another planet/moon, high risk

22

Cryobot

Image Credit: NASA/JPL-Caltech
Required for traveling through ice
PROS:

- Uses heat to drill through ice, no moving parts

CONS:

- Only works on ice
- A rocky layer may stop it
- Untested on another planet/moon, high risk

23

Hydrobot

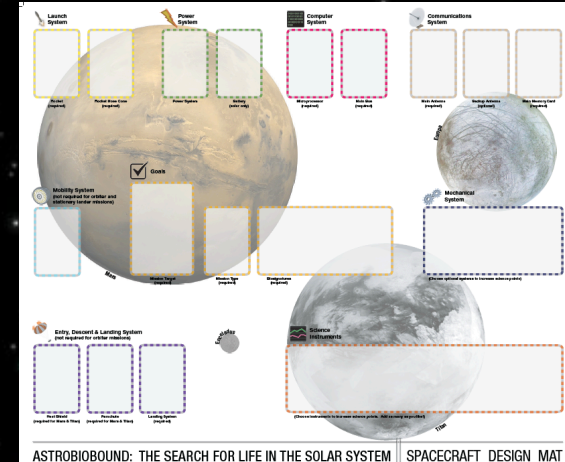

Image Credit: NASA/JPL-Caltech
Required for exploring subsurface water
PROS:

- Navigate subsurface lakes or oceans

CONS:

- Autonomous operation only
- Untested on another planet/moon, high risk
- Also requires Cryobot (#23)

24

VIDEOS!

- Finding Life Beyond Earth (NOVA) – also clips and lesson plans)
- Alien Planets Revealed (NOVA)
- The Search for the Origins of Life (MSU-PBS) also clips and lesson plans)
- Planetary Lake Lander series (NASA) - short clips

Web-based Interactives

- Alien Safari (JPL)
- Extreme Planet Makeover (JPL)
- Virtual Field Trips (ASU)
- A Historic Timeline of the Search for Other Worlds (Planet Quest/JPL)
- A Needle in Countless Haystacks (TED-Ed)
- Coursera courses X 2!

Posters, “Trading Cards,” Graphic Novels

- Astrobiology Education Poster (NASA) – with lesson plans, too
- Astrobiology Graphic Histories (NASA) issues 1-5
- Extremes of Life Trading Cards (NASA)
- Planetary Maps Designed for Children (ICA)
- Solar System Poster (NOVA)
